

STA 371G: Statistics and Modeling

Fall 2018

Session 1, 04515, Monday & Wednesday 2:00 - 3:30 PM, Room: UTC 4.134

Session 2, 04530, Monday & Wednesday 3:30 - 5:00 PM, Room: UTC 4.134

Instructor: Mingyuan Zhou, Ph.D., Assistant Professor of Statistics

Office: CBA 6.458 (east side of the building that faces the entrance of Gregory Gym)

Phone: 512-232-6763

Email: mingyuan.zhou@mcombs.utexas.edu

Website: <http://mingyuanzhou.github.io/>

Office Hours: Monday & Wednesday 5:00-6:00 PM

You are welcome to come by my office at other times. To make sure that I will be there then, you may first call my office or send me an email.

Teaching Assistants:

Quan Zhang, quan.zhang@mcombs.utexas.edu, IROM PhD Student

Office Hours: Tuesday 3:30-5:00 PM, CBA 4.304A

Course Website: <http://mingyuanzhou.github.io/STA371G/>

Course Description: This course introduces statistical methods and data analysis tools to model uncertainty in business decisions. After a brief review of basic probability and statistics, we will discuss regression models, time series analysis, and decision making. Simulation with statistical software will be incorporated into these topics and used throughout the semester. The introduced statistical models will be illustrated with a large number of real examples, such as those in finance, marketing, economics, politics, and sports. Analyzing real datasets with R and Excel will be demonstrated in class. The techniques taught in the course will also be useful in performing data analysis in other BBA courses.

By the end of the course, you will be equipped with the necessary statistical knowledge and skills to solve real-world business problems. Specifically, you will learn how to choose an appropriate statistical model to analyze business data, perform computation with statistical software, validate the output of the model, and draw appropriate conclusions.

Materials:

- Text:
 - (a) Data Analysis and Decision Making with Microsoft Excel by Albright, Winston and Zappe, 3rd/4th edition, or Business Analytics: Data Analysis and Decision making by Albright and Winston, 6th edition. It covers most of the topics of this course. A UT customized version is available at a lower price. It is recommended but not required.
 - (b) OpenIntro Statistics by Diez, Barr and Çetinkaya-Rundel, 3rd Edition, available for free at <http://www.openintro.org/stat/textbook.php>. This book provides a review of basic probability and statistics. It is recommended but not required.

(c) Data Science: A Gentle Introduction by James G. Scott, available for free at https://jgscott.github.io/STA371H_Spring2018/files/DataScience.pdf

(d) Course packet available at University Coop. It contains the cases to be studied in this course. One course packet for each group would usually be sufficient.

- Software:

(a) **R** and **RStudio** (free software). Learning basic operations with R is recommended, though not required. I will use R for class demonstrations and post the R code on the course website. Running these R code by yourself will help you better understand randomness and uncertainty, and practice your data analysis skills. You are free to use any other software, such as Matlab, Python, and SAS.

(b) Excel, **Palisade Decision Tools (including StatTools)** for Windows, **StatPlus:mac LE** for Mac.

Grading:

Homework (15%)

In Class Quizzes (6%)

Midterm Exam 1 (23%)

Midterm Exam 2 (23%)

Final Exam (33%)

Homework: You will receive a total of around eight homework assignments throughout the semester. You may form groups to complete homework assignments. Each group may consist of no more than three members. Each group only need to turn in one report.

For class discussions and homework assignments, we will study the following eight business cases:

1. Amore Frozen Food, UVA-QA-0317
2. Waite First Securities, UVA-QA-0453
3. Milk and Money, KEL343
4. Orion Bus Industries: Contract bidding strategy, IVEY 9B03E005
5. Oakland A's A, UVA-QA-0282
6. Oakland A's B, UVA-QA-0283
7. Northern Napa Valley Winery, Inc, IVEY 9A98E046
8. Freemark Abbey, Harvard 9-181-027

You may either purchase these cases individually online or purchase the course packet that contains all the eight cases. One course packet for each group would usually be sufficient.

Exams:

- Midterm Exam 1 will be on Wednesday, October 10 (UTC 2.102A, 6:45-9:00 pm).
- Midterm Exam 2 will be on Wednesday, November 14 (GSB 2.124, 6:45-9:00 pm).
- Both midterm exams will be held in the evening to reduce exam stress.
- The final exam is cumulative and covers basic probability and statistics, linear regression, time series, decision making, and simulation. It will be given during the University's final exam period. The specific date is determined by the University.
- Your first midterm exam score could be replaced by the second midterm exam score or the final exam score, whichever is higher. Your second midterm exam score could be replaced by the final exam score if it is lower than the final exam score.
- Clerical errors will be corrected without hassle. Other regrading requests must be submitted in writing within one week (7 days) of the exam's return.
- You may bring one, two, and three pages (8.5×11 inch, letter size) of notes and formulas to the first midterm, second midterm, and final exams, respectively.
- You may bring a calculator to the midterm and final exams.
- There is no predetermined grade distribution for this class.

Tentative Course Schedule:

This schedule represents my current plans and objectives. As we go through the semester, those plans may need to change to enhance the class learning opportunity. Such changes, communicated clearly, are not unusual and should be expected.

A more detailed [Course Outline](#) in the course website will be updated on a regular basis.

Week 1

Aug 29, Introduction, random variables and probability distributions

Week 2

Sept 3, Labor Day holiday (No Classes)

Sept 5, Random variables and probability distributions

Week 3

Sept 10, Normal and binomial distributions

Sept 12, Estimation and sampling distributions

Week 4

Sept 17, Simple linear regression: least squares estimation

Sept 19, Simple linear regression: covariance and correlation, goodness of fit

Week 5

Sept 24, Simple linear regression: model assumptions

Sept 26, Sampling distributions for regression parameters

Week 6

Oct 1, Confidence intervals for regression parameters

Oct 3, Hypothesis testing for regression models

Week 7

Oct 8, Multiple regression, [Review for Midterm Exam 1](#)
Oct 10, Multiple regression
Oct 10, Midterm Exam 1 (UTC 2.102A, 6:45-9:00 pm)

Week 8

Oct 15, Multiple regression
Oct 17, Dummy variables and interactions

Week 9

Oct 22, Diagnostics and transformations
Oct 24, Diagnostics and transformations

Week 10

Oct 29, Time series
Oct 31, Time series

Week 11

Nov 5, Model selection
Nov 7, Decision making

Week 12

Nov 12, Decision making, [Review for Midterm Exam 2](#)
Nov 14, Decision making
Nov 14, Midterm Exam 2 (GSB 2.124, 6:45-9:00 pm)

Week 13

Nov 19, Decision making
Nov 21, Thanksgiving Holidays

Week 14

Nov 26, Introduction to Monte Carlo simulation
Nov 28, Simulation, Case Study

Week 15

Dec 3, Final exam practice questions
Dec 5, Final exam practice questions

Week 16

Dec 10, Simulation, Case Study, [Review for the Final Exam](#)

Office Hours: Don't hesitate to come to my office at CBA 6.458 during office hours (Monday & Wednesday 5:00-6:00 PM) to discuss homework problems or any other aspects of the course. Please feel free to come by my office at other times, but to make sure that I will be there then, you may first call my office, send me an email, or talk to me before or after class to make an appointment.

Quantitative Reasoning Flag: This course carries the Quantitative Reasoning flag. Quantitative Reasoning courses are designed to equip you with skills that are necessary for understanding the types of quantitative arguments you will regularly encounter in your

adult and professional life. You should therefore expect a substantial portion of your grade to come from your use of quantitative skills to analyze real-world problems.

University of Texas Honor Code: The core values of The University of Texas at Austin are learning, discovery, freedom, leadership, individual opportunity, and responsibility. Each member of the university is expected to uphold these values through integrity, honesty, trust, fairness, and respect toward peers and community.

Academic Integrity: Each student in this course is expected to abide by the University of Texas Honor Code. Any work submitted by a student in this course for academic credit will be the student's own work.

You are encouraged to study together and to discuss information and concepts covered in lecture and the sections with other students. You can give "consulting" help to or receive "consulting" help from such students. However, this permissible cooperation should never involve one student having possession of a copy of all or part of work done by someone else, in the form of an e-mail, an e-mail attachment file, a diskette, or a hard copy.

Should copying occur, both the student who copied work from another student and the student who gave material to be copied will both automatically receive a zero for the assignment. Penalty for violation of this Code can also be extended to include failure of the course and University disciplinary action.

During examinations, you must do your own work. Talking or discussion is not permitted during the examinations, nor may you compare papers, copy from others, or collaborate in any way. Any collaborative behavior during the examinations will result in failure of the exam, and may lead to failure of the course and University disciplinary action.

Students with Disabilities: Students with disabilities may request appropriate academic accommodations from the Division of Diversity and Community Engagement, Services for Students with Disabilities, 512-471-6259, <http://www.utexas.edu/diversity/ddce/ssd/>.

Religious Holy Days: By UT Austin policy, you must notify me of your pending absence at least fourteen days prior to the date of observance of a religious holy day. If you must miss a class, an examination, a work assignment, or a project in order to observe a religious holy day, you will be given an opportunity to complete the missed work within a reasonable time after the absence.

Policy on Scholastic Dishonesty: The McCombs School of Business has no tolerance for acts of scholastic dishonesty. The responsibilities of both students and faculty with regard to scholastic dishonesty are described in detail in the BBA Program's Statement on Scholastic Dishonesty at <http://www.mcombs.utexas.edu/BBA/Code-of-Ethics.aspx>. By teaching this course, I have agreed to observe all faculty responsibilities described in that document. By enrolling in this class, you have agreed to observe all student responsibilities described in that document. If the application of the Statement on Scholastic Dishonesty to this class or its assignments is unclear in any way, it is your responsibility to ask me

for clarification. Students who violate University rules on scholastic dishonesty are subject to disciplinary penalties, including the possibility of failure in the course and/or dismissal from the University. Since dishonesty harms the individual, all students, the integrity of the University, and the value of our academic brand, policies on scholastic dishonesty will be strictly enforced. You should refer to the Student Judicial Services website at <http://deanofstudents.utexas.edu/sjs/> to access the official University policies and procedures on scholastic dishonesty as well as further elaboration on what constitutes scholastic dishonesty.

Campus Safety: Please note the following recommendations regarding emergency evacuation, provided by the Office of Campus Safety and Security, 512-471-5767, <http://www.utexas.edu/safety>:

- Occupants of buildings on The University of Texas at Austin campus are required to evacuate buildings when a fire alarm is activated. Alarm activation or announcement requires exiting and assembling outside.
- Familiarize yourself with all exit doors of each classroom and building you may occupy. Remember that the nearest exit door may not be the one you used when entering the building.
- Students requiring assistance in evacuation should inform the instructor in writing during the first week of class.
- In the event of an evacuation, follow the instruction of faculty or class instructors.
- Do not re-enter a building unless given instructions by the following: Austin Fire Department, The University of Texas at Austin Police Department, or Fire Prevention Services office.
- Behavior Concerns Advice Line (BCAL): 512-232-5050
- Further information regarding emergency evacuation routes and emergency procedures can be found at: <http://www.utexas.edu/emergency>.
